Full job description

Company Profile:

Accuenergy is a fast-growing company at the forefront of the energy management industry. We specialize in providing innovative solutions to help businesses optimize their energy usage, reduce costs, and minimize their environmental impact. Our commitment to excellence and innovation, coupled with our start-up mentality and fast-paced environment, has fueled our rapid expansion, making this an exciting time to join our dynamic team.

Why work for Accuenergy:

At Accuenergy, we are committed to fostering a diverse and inclusive workplace where all employees are empowered to thrive. We offer competitive compensation, comprehensive benefits, and opportunities for professional development and growth within our rapidly expanding organization.

- Bi-weekly payment through direct deposit
- Free tasty Coffee & beverages
- **Paid statutory holidays+ vacation benefit +insurance benefit**
- **Enhance training opportunities in job-related field**

Duties and Responsibilities:

- Plan, develop, and maintain company website using PHP, JavaScript, HTML, CSS, MySQL, Apache, Linux and other relevant technologies
- Plan and execute API integrations such as HubSpot, Zoho, Dynamics
- Utilize Bitbucket for version and source control
- Participate in meetings to provide project updates, issues, learnings, and ideas
- Manage and prioritize multiple project requests using Jira
- Document and organize all implementation procedures
- Develop testing process and procedure plan for implementations
- Refactor existing code to improve code design, structure, and implementation
- Ensure Occupational Health and Safety compliance with health and safety laws and regulations.
- Follow all procedures in compliance of Accuenergy (Canada) Inc standard policy and operation regulations.
- Any other operation-related responsibilities may be added as company continues to grow.

Qualifications & Requirements:

- Proficient in developing in PHP, MySQL, Apache, Linux (LAMP) environment
- Deep working knowledge of JavaScript, HTML, & CSS
- Build custom WordPress/WooCommerce, Next.js themes and plugins
- Able to navigate Linux command line and Crontab
- Understand web hosting, domain registration, DNS, and SSL encryption.
- Experience with CDN and caching strategies.
- Work with APIs (e.g., HubSpot, MS Dynamics, payment gateways) to extend and develop applications
- Conduct code review for other developers

- Experience using Bitbucket / Git for source code control

We are looking for:

- Strong written and verbal English communication needed to breakdown technical topics to non-developers
- Able to work independently without much supervision
- Advocate and understand development best practice
- Able to prioritize projects base on business value
- Able to debug and problem-solve issues under pressure
- Able to tackle and overcome new development challenges fast and efficiently
- A self-starter who is able take ownership of projects and offer improvements
- Understand project scope and whether projects can be completed in a timely manner

About You:

- PHP and MySQL: 4+yearswork experience
- JavaScript, HTML, CSS: 4+yearswork experience
- Bachelor's degree or equivalent experience in Computer Science
