---

Technical Professional with a solid foundation in Computer Programming, hardware lifecycle management, and systems diagnostics. Proven track record of resolving complex operating system, networking, and component-level hardware issues efficiently. Adept at managing high-volume ticket environments, optimizing data workflows, and delivering exceptional customer service.

---

## EXPERIENCE

### Computer Repair Technician

ICT Workshop, Scarborough, On

2023

- Diagnosed, upgraded, and repaired PC and laptop components (memory modules, storage drives), maintaining speed and efficiency to meet high daily service volumes.
- Identified and resolved complex root-cause system issues, optimizing operating systems and configuring software, drivers, and BIOS settings.
- Conducted proactive system maintenance, malware removal, security patching, and network/software updates to ensure ongoing platform stability.
- Delivered customer-centric technical support, efficiently resolving user issues and maximizing first-contact resolution rates.
- Created and maintained an organized knowledge base log of technical problems and solutions to assist team analysts and streamline standard operating procedures.

### Hardware Support Technician | *Bluum*

*Formerly titled "Parts Coordinator"*

75 Clegg Rd. Markham, On

November 2023 – November 2024

- Managed technical inventory and verified hardware compatibility to streamline system deployment logistics.
  - Consulted technical manuals and hardware schematics to diagnose and execute component-level solutions, ensuring high-quality device performance.
  - Implemented strict data security protocols and executed physical data sanitization to ensure total privacy compliance.
  - Maintained data integrity and accuracy within asset logging systems to minimize operational anomalies.
- 

## EDUCATION

- **Computer Programming (Advanced Diploma) | *Seneca Polytechnic, Toronto, ON***

Enrolled (Finishing August 2026)

- **Computer Repair and Maintenance (Certificate) | *Centennial College, Toronto, ON***  
Graduated August 2023
- 

## Skills

- **Operating Systems & Networking:** Windows, macOS, Linux, network infrastructure concepts, system configuration.
- **Hardware & Systems Diagnostics:** BIOS/firmware optimization, component-level repair, hardware compatibility verification, system teardowns.
- **Software & Scripting:** PowerShell, SQL (Oracle/MySQL), JavaScript, C++, Java, C#.
- **Support & Operations:** High-volume ticket resolution, technical manual interpretation, data sanitization, privacy compliance.
